The custom engravings are available through engravers and award/ trophy/ gift retailers. Sandblasting is the most recommended engraving method for Optical Crystal to achieve deep etched result.

The engravings illustrated in this catalog are for display purpose only. Artworks, Logos, and registered trademarks represented herein are property of their respective owners. We assume no liability for any disputes arising out of any alleged unauthorized use of the artwork, logos, and trademarks engraved on products shown. The pieces displayed in this catalog are original works. Only copyright owners can copy, reproduce, and authorize distribution of works substantially similar to these works regardless of the form of the work.

ABOUT PRISM CRYSTAL

PRISM ELITE: UNMATCHED ELEGANCE

When you take an idea, and turn it into a piece of art with purpose you have something that goes beyond the realm of traditional awards; you have something Elite. This series is created specifically for us by Peter Yenawine; renowned crystal designer/sculptor with the skill and detail that only a master craftsman can bring. All of the Elite series uses the highest quality of optic crystal in existence, equal to that used in telescopes and cameras. Many of the pieces use the pâte de verre technique to create meticulous detail and one-of-a-kind artwork unseen anywhere else in the awards industry.

EUROPEAN GLASSWARE: FUNCTIONAL BEAUTY

Crystalite Bohemia is a top of the line manufacturer in the Czech Republic, in a region that has a rich tradition in glass production dating back to the end of the 16th century. These products use only the latest, ecologically-clean molten glass called "crystalite", which when refined and handled with precision is equal in quality to 24% leaded crystal. These pieces are immaculate combinations of both artful craftsmanship and complete functionality, which find themselves adorning the homes and offices of numerous fortunate individuals around the world.

BOHEMIA LEAD VASES: SUPERIOR AWARDS FOR SUPERIOR PERFORMERS

Each Lead Crystal Vase is mouth blown and hand cut from beginning to end with 24% lead crystal. Each bevel and cut is meticulously done by hand from the finest professional Czech glass workers. With a rich tradition in glass productions, these pieces are brilliant with bevels that refract a maximum amount of light to dazzle the senses. Due to the lead content it is not advised to place anything for consumption inside these vases.

DESIGNER ART GLASS: MAKE A BOLD STATEMENT

Each Art Glass Award is individually hand crafted to create unique patterns of color that speak to everyone differently; with the flowing lines of color following the contours of the glass in perfect harmony. Shape, color and dimensions will vary slightly in each piece. Bubbles are inherent to art glass blowing process.

ITALIAN CRYSTAL VASES: REWARDING WITH SIGNATURE ART

Each Italian Crystal Vase is mouth-blown with 24% lead crystal, while each bevel and cut is meticulously done by the hands of professional craftsman at either the Mario Cioni or Agarthi factories in Italy. These pieces are the ultimate in show-stopping brilliance, with a weight that accentuates their value and bevels that refract a maximum amount of light to dazzle the senses. Due to the lead content it is not advised to place anything for consumption inside these vases.

OPTIC CRYSTAL: RECOGNIZING EXCELLENCE

Optic Crystal is among the finest of all crystals available, and with a variety of styles, prices, shapes and themes, our optic crystal awards are extremely high quality and impeccably designed. Unlike lead crystal, Optic Crystal is lead free; perfect for more popular engraving methods. Each piece is hand polished and beveled to achieve a mystical light refraction. Blue, black, green, and amber accents are used to give a more contemporary design.

GLASS AWARDS: MOTIVATING GREATNESS

Jade Glass is valued for its economical price and the beautiful green tint caused by iron ore content, making it very popular for special awards. Starfire, or Clear Glass has a low iron content, with a slight bluish tint that acts as a great perk to wonderfully designed awards. Excellent clarity, although not clear enough to be called "crystal". Molten Glass is made by pouring melted glass into a mold, which makes it a great media to capture detail. Bubbles and flow lines are considered acceptable, and slight variations in size or finish are inherent.

PRISM VALUE: ECONOMICAL PRESENTATION

When budget is a concern, the Prism Value section provides quality awards with affordability. These carefully chosen items represent some of the most popular sizes, shapes, and designs in the industry for recognizing great achievement. The Prism value section represents a commitment to excellence while keeping a low cost.

DESIGNER'S INSPIRATION

The overall inspiration was to create works of art that could be personalized for presentation, recognizing outstanding achievement.

A work of art must be perfect in form and proportion before it can be considered for decoration or customization. All of the works in this collection have considered personalization as a major parameter in their creation. Therefore, whether you simply select a piece and present it as a work of art, or completely personalize it for a particular corporation, occasion, or milestone, it is assured to be treasured by the recipient for generations.

The individual works were conceived in order to recognize significant achievement in specific arenas: leadership; integrity; responsibility; sales, and promoting the corporate culture.

Peter Wayne Yenawine

Optic Crystal | Gift Box Included

a

b

Pâte De Verre: Pâte de Verre, as a material, is a 24-percent lead crystal paste made from specially produced batches of granular crystal. The creation of items in pâte de verre through the “lost wax” technique is a very complex and time-consuming process requiring abundant skills. The results after the successful application of these skills are true works of art, possessing a unique translucency, texture and substance, which cannot be achieved with blown or molded glass.
